PROFILE

Software Engineering graduate with practical experience in full-stack development, AI/ML applications and cloud technologies. Skilled in MERN Stack, Spring Boot, AWS, and software engineering best practices, with a strong foundation in designing, developing, and deploying scalable solutions. Passionate about problem-solving, continuous learning and leveraging emerging technologies to create meaningful business impact while contributing effectively to organizational success.

TECHNICAL SKILLS

- Languages: **Java, JavaScript, Python, C++, C, HTML, CSS**
- Frameworks: **MERN Stack (MongoDB, Express, React.js, Node.js), Spring Boot, React Native**
- Database Management: **MongoDB, MySQL, SQLite**
- Cloud & DevOps: **AWS, Docker, Git**
- Software Engineering: **OOP, REST APIs, Microservices, CI/CD Pipelines, Agile, SDLC, JWT**
- Tools and platforms: **GitHub, Figma, Android Studio**

PROJECT EXPERIENCE

1. Diabetic Grocery Receipt Analyzer | 07/2026

- Created an AI-powered health-tech application that analyzes grocery receipts and provides diabetic-friendly food insights, risk assessments, and personalized dietary recommendations.
- Implemented an automated workflow to extract grocery items, evaluate nutritional risks, and generate actionable shopping guidance for healthier decision-making.
- Designed a scalable cloud-based solution to process user inputs, manage analysis history, and deliver personalized reports through email communication.
- Developed a user-friendly interface allowing users to upload receipts, review analysis results, and access previous recommendations.
- *Technologies:* **AWS (Lambda, API Gateway, S3, Rekognition, DynamoDB, SES, IAM), React.js, JavaScript, Python**

2. NLP Fine-tuning Research - Meeting Transcript Analysis | 05/2026

- Developed an NLP workflow to generate structured hierarchical summaries and action items from meeting transcripts.
- Data preparation, Fine tuning using DistilBERT (intent tagging) with AMI Corpus, spaCy transformer NER for entity extraction, and SBERT + BERTopic for topic discovery.
- *Technologies:* **Python, spaCy, DistilBERT, SBERT, BERTopic**

3. Event Ticket Booking Platform – Event Service | 04/2026

- Built event management microservice (CRUD, search/filter, availability, ticket updates, ratings).
- Containerized Node/Express service with MongoDB.
- Deployed on AWS ECS Fargate with ECR images, ALB + API Gateway routing; CI/CD with GitHub Actions, SonarCloud, Snyk.
- *Technologies:* **Docker, AWS (ECS, ECR, ALB, API Gateway, CloudWatch), GitHub Actions, SonarCloud, Snyk.**

4. EV Charging station Android App | 08/2025

- Implemented a nearest EV charging station discovery feature with real-time Google Maps integration.
- Offline data support and detailed station views using interactive map markers and bottom sheets.
- *Technologies*: **Java, Retrofit, SQLite**

5. Epic Eats – Cloud-Native Food Ordering & Delivery System | 04/2025

- A scalable Delivery Service in a microservices architecture using Docker and K8s.
- Driver registration, role management, real-time delivery assignment, and status tracking workflows.
- Utilized Nominatim API for precise geolocation and optimized auto driver assignment.
- Integrated real-time location tracking for drivers and live map updates for customers using Socket.IO.
- *Technologies:* **MERN Stack, Docker, Kubernetes, Socket.IO**

6. Simple Portfolio Tracker - Stock Portfolio Management Application | 01/2025

- Designed and implemented features to manage stock holdings for efficient portfolio management.
- Integrated with the Alpha Vantage API to fetch real-time stock prices and ensure accurate portfolio updates.
- A dashboard displaying key metrics like total portfolio value, top-performing stock using Recharts for dynamic data visualization.
- *Technologies:* **Spring Boot, ReactJS**

7. Doc App - Doctor Appointment Booking Mobile App | 10/2024

- Developed a medical report viewing module, allowing users to upload and view their reports seamlessly.
- Interactive charts and graphs for tracking health data trends (blood pressure, glucose, etc.)
- *Technologies:* **React Native, Fire Store, Expo.**

EDUCATION

BSc (Hons) in Information Technology (Specializing in Software Engineering) 2022 - 2026
*Second Class Upper Division (**CGPA: 3.52**)*
Sri Lanka Institute of Information Technology (SLIIT) | Sri Lanka

Dean's List: 2nd Year 2nd Semester with 3.86 GPA
4th Year 2nd Semester with 3.95 GPA

Research Publication: *https://ieeexplore.ieee.org/document/11537086*

EXPERIENCE

Software Engineer Intern | Sri Lanka Telecom 2025 June-Dec

- *Contributed to the development and enhancement of the **MySLT Web Portal** using the **MERN Stack.***
- *Developed and maintained application features, integrated RESTful APIs, and performed debugging and code reviews throughout the SDLC.*
- *Collaborated with cross-functional teams in an Agile environment, leveraging Git for version control to deliver high-quality software solutions.*

CERTIFICATES

AWS Cloud Practitioner Essentials
Amazon Web Services (AWS) 2026 Jun

AI/ML Engineer - Stage 2
Sri Lanka Institute of Information Technology (SLIIT) 2026 May

AI/ML Engineer - Stage 1
Sri Lanka Institute of Information Technology (SLIIT) 2024 Jan

Python for Beginners
University of Moratuwa
Credentials: Verification code: DViauZEcmo, Verification Url : https://open.uom.lk/verify 2023 Dec
